Jr.PHP Developer **AUG 2022 - Present**
Kanexy Pvt Ltd *Hyderabad, Telangana*

- Collaborated with senior developers to develop web applications using Laravel.
- Used JavaScript, HTML, and CSS to create responsive web pages for customer use.
- Developed and maintained REST APIs integrated the payment gateway such as Razorpay, paypal.
- Worked collaboratively with a team to deliver high-quality code on time and within budget.
- Experience with the version controls GIT, GitHub, Azure DevOps and Bitbucket.
- Capable of troubleshooting and optimizing Laravel applications for performance and scalability.
- Experience in banking application creation with fintech services

EXTRA CURRICULAR

- Two weeks industrial implant training for soft skills and web development.

PROJECTS

- **International Money Transfer Application:** I have experience working with the International Money Transfer Application (IMT Application). Customers can use a variety of payment methods and the precise current exchange rate to transfer money across countries. For this application, we developed a custom Laravel package and included rest APIs.
- **E-commerce Applications:** I have experience working with applications for grocery, and fashion e-commerce.

- **Event Application:** I worked on creating an event application that would allow customers to purchase tickets online using a scan system. The ticket would then be scanned and the attendance of the attendees would be updated,
- **Bank Account opening application:** I have worked on creating an bank account for user firstly user will be fill information for account opening,after that user information will be store in database an by agent agent will check the new customer list request for account opening, he application will create an user account manually.
